I am an Assistant Professor in Department of Physics and Astronomy at University of California Los Angeles (UCLA), and also an affiliated Staff Scientist in Theoretical Division (Group T-2: Nuclear and Particle Physics, Astrophysics and Cosmology) at Los Alamos National Laboratory (LANL). My research interests are primarily in Quantum Chromodynamics (QCD) and strong interaction, and their applications in high energy nuclear and particle physics. The main research efforts have been focused on: (1) hadron physics, (2) QCD collider physics, (3) heavy ion physics. My research is relevant for all existing and planned experiments in high-energy nuclear and particle physics ranging from JLab-12 to the LHC, including a future Electron Ion Collider (EIC) in US, recently recommended as a highest priority in U.S. Department of Energy's 2015 Long Range Plan for Nuclear Science.
